

Givi A750 (16" x 15")

Givi A755 (14" x 18")

Givi A760 (16" x 22")

Givi A770 (15.2" x 17")

National Cycle F-15 Sport (12" high; adjustable up to 20 degrees)

National Cycle F-15 Touring (17" high; adjustable up to 20 degrees)

? don't know which windscreen this person has on his SV

Comments made by some SV'ers:

I have the Givi a240 windscreen (14"x18") on my 06 sv650. I have it in gloss black, and it does look sharp with the black frame and Napoleon bar end mirrors. It provides a still air pocket in front of my chest, but there is still a lot of (maybe more) helmet buffeting. I am 6'1". If I had to do it over I would consider the a760. -Tony Asheville, NC

I've got the Givi 760 in blue on my '05 Blue Nekkid bike. It's one of the largest sizes they make. You can check it out on our SVRiders photobucket site in the Miscellaneous section (pictured above). I'm very happy with it. -Rachelle
